

a Recall against observed phenotype

one row per curated mapping; nothing pooled

GIFT layer: substrate use or product formation

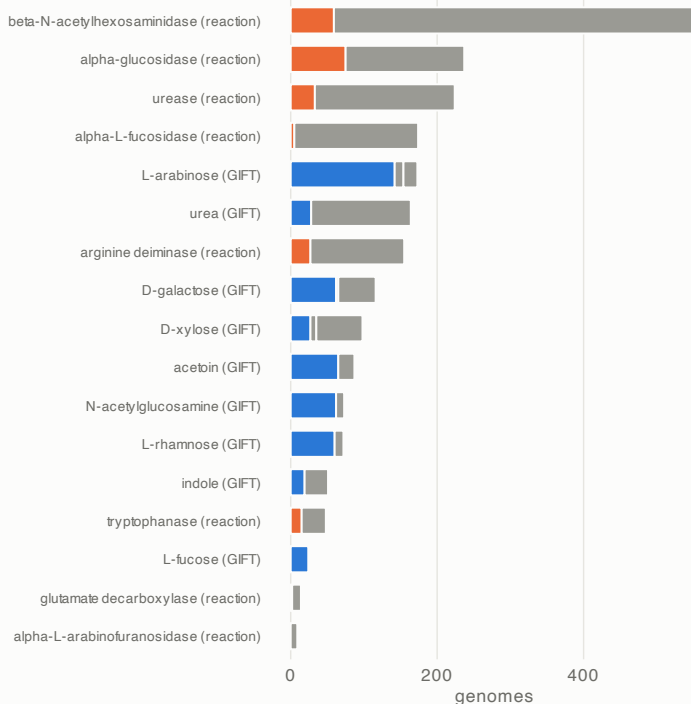

reaction layer: EC-resolved enzyme assay

c Every disagreement, classified

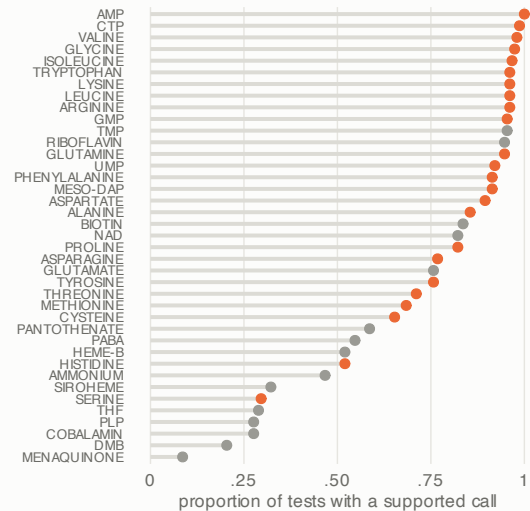

grey is permitted under invariant 15, never an error

failure: no evidence at all
failure: incomplete route, step named
permitted: encoded, not observed

b Anabolic half: defined media

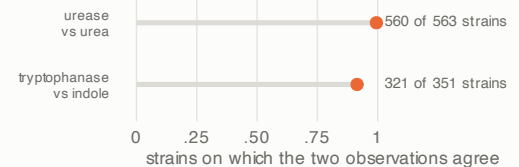

3644 tests on the essential classes; one point per nu

biomass-essential: the premise holds
not biomass-essential: premise fails

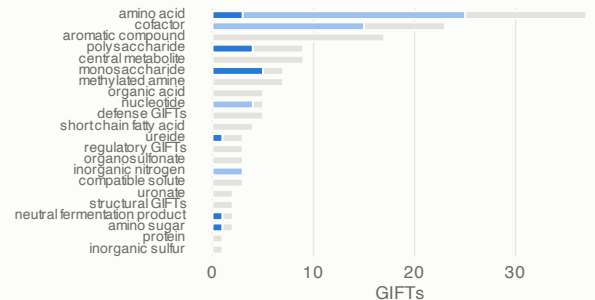

d The reference against itself

two independent assays of one capability

e Testable at all: 15 of 153 GIFTs

the unstable majority is named, not a remainder

individually testable
only as a bounded-frame aggregate
no phenotype reference at all

f The same genomes, three annotations

complete calls over 398 genomes
